

Thanks to whomever! This seems to be up now:

```
nlr-e300#show interfaces description
```

Interface	OK?	Status	Protocol	Description
TenGigabitEthernet 0/0	YES	up	up	NLR-WASH-STAR-10GE-22

It looks like it came up about 2:10 PM this afternoon.

```
nlr-e300#show log
```

```
Dec 2 14:10:21 EST: %RPMO-P:CP %IFMGR-5-OSTATE_UP: Changed  
interface state to up: Te 0/0
```

I guess IP addresses are the next step.

-Thanks again

-Bill
